# Population Exposure

### **Structures**

Overall, the population in this region resides in structures that are highly vulnerable to earthquake shaking, though some resistant structures exist. The predominant vulnerable building types are mud wall and reinforced/confined masonry construction.

## **Historical Earthquakes**

Date	Dist.	Mag.	Max	Shaking
(UTC)	(km)		MMI(#)	Deaths
1987-09-22	353	6.3	VI(53k)	2
1990-06-09	236	5.5	VII(112k)	1
1990-05-30	228	6.5	VIII(131k)	135

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.
